

1

weekly notice

Monday, 5 January 2015
Sunday, 11 January 2015

Safeworking information, such as Weekly Notices and SAFE Notices, is available on the RailSafe website.

By accessing Weekly Notices and SAFE Notices online, you will receive safety information more quickly. Weekly Notices remain on the RailSafe website for two years; Permanent and Temporary SAFE Notices remain online as long as they are current. Anyone needing back issues of Weekly Notices and SAFE Notices should contact the Network Rules unit.

If you are outside Sydney Trains, you can reach the RailSafe website via the following address:

www.railsafe.org.au

Other Safeworking documents, such as Network Rules, Network Procedures, Network Local Appendices, Safeworking Policies, SafeTracks flyers, and contractor information are also available online.

PUBLICATION DEADLINES AND SUBMISSION OF ARTICLES

Dates of the next five Weekly Notices and deadlines for articles are:

Weekly Notice	For Week	Deadline
2	12/1/15–18/1/15	16/12/14
3	19/1/15–25/1/15	16/12/14
4	26/1/15–1/2/15	30/12/14
5	2/2/15–8/2/15	6/1/15

So that printing and distributing schedules can be met, it is essential articles are received by the deadline.

Late articles will be published in the next issue of the Weekly Notice. This may result in information not being distributed in time for it to be acted upon.

When submitting articles, please include your name, position title, telephone numbers and email details at the end of the articles as shown below:

TRAIN EXAMINATIONS – EXTRA PRECAUTIONS DURING THE WOLO RISK PERIOD (OCTOBER TO MARCH)

ATTENTION: All train examiners

Rollingstock can contribute to track buckles.

Between October to March each year, higher temperatures increase the risk of track buckles on welded track due to expansion of the rails.

Rollingstock with poorly tracking or hunting bogies can apply additional lateral force to the rails that disturb the track structure under these conditions. This can contribute to track buckling under a train or after the passage of a train.

Train examinations: Passenger and freight trains

To reduce the track buckling forces from rollingstock, the following components should be inspected more closely during the WOLO risk period:

Constant contact side bearers (where fitted)

Check for wear of non-metallic components, and that the side bearers are seating correctly with no gap (see Figure 2). This applies mainly to freight, but also applies to passenger rollingstock such as NHA bogies under XPT and J type bogies under L, R, S, K and C sets.

Friction wedges

Check for excessive wedge rise, condemn notch thickness, and wear plate condition.

Wheel profiles

Check for excessive flange wear and arises.

Overloading or unbalanced loading

Check For spring deflection, obviously incorrect loading of wagon including over decks of multipack wagons.

Continued on the next page

Evidence of hunting

Tell-tale signs of hunting are any of the following:

- fresh bolster gib wear (see Figure 1)
- wear between the side of the friction wedge and bolster pocket (see Figure 1)
- fresh wear between the axle box or the bearing adaptor and bogie side frame
- melting of plastic elements in the constant contact side bearers due to friction heating (see Figure 3).

Freight wagons with the following hunting defects should be marked off, or reduced to 50km/h maximum speed, when a WOLO has been declared.

Figure 1: High gib/side frame wear and friction wedge lateral wear

Figure 2: Constant contact side bearer with point contact

Figure 3: Constant contact side bearers with melted plastic blocks

What to do if defects are detected or reported

Defects are usually identified via passenger complaints (for passenger trains), and drivers and wayside staff reports and observations, including roll-by inspections (for freight trains).

Any passenger vehicle, freight train or locomotive should undergo corrective action if suspected of hunting.

Freight vehicles showing any of the above defects should be marked off, or operate at reduced speed until corrective action is taken.

The reduced speed shall be the maximum permitted track speed not exceeding 50km/h when a WOLO has been declared.

The reduced speed when a WOLO has been declared is published in the Train Operating Conditions Manual General Instruction Pages, Section 3 Page 5.

Note: These items form part of the normal train examination procedures, but are especially important at this time of year when track buckles are a greater risk. Please refer to your examiners manuals for the inspection procedure and limits for these components and, if you have any questions, speak with your supervisor.

TRACK DISTURBANCE BETWEEN OCTOBER AND MARCH

ATTENTION: All engineering and construction staff who work on or about the track

Disturbance of the track during the period October to March can cause track misalignments (track buckles).

Be aware of:

- Bumping of the track (e.g bumping the track with a front-end loader).
- Knocking down or removing ballast profile (e.g running along the ballast shoulder in a truck).
- Undermining the ballast profile by excavation (e.g excavating a trench beside or under the track).

Report all track disturbances

If the track is disturbed, report it immediately to local track staff.

Planned work to be advised to email address PermissionToDisturb@transport.nsw.gov.au

RE-ISSUE OF STANDARD WORKING TIMETABLE 2013, RAIL PASSENGER SERVICES BOOKS 1 AND 2

FROM SUNDAY, 25 JANUARY 2015

The Standard Working Timetable 2013, Rail Passenger Services Books 1 & 2 will be re-issued with effect from **Sunday 25 January 2015**.

Books 1 & 2 will be designated as Version 4.00, (141212) to replace the Standard Working Timetable 2013, Rail Passenger Services, Books 1 & 2, Version 3.31, (140417), from 07 June 2014 and all subsequent amendments.

Any copies of Books 1 & 2 not designated as Version 4.00, (141212) are to be discarded.

With the re-issue of the Standard Working Timetable 2013, Rail Passenger Services from 25 January 2015, a number of changes to the content and format of the Working Timetable have been incorporated:

- Altered train numbering, stabling arrangements and revised train rosters for the majority of Sector 2 and selected Sector 3 services
- Introduction of South West Rail Link (SWRL) revenue Shuttle service
- Deployment of a 4 car Millennium set to the Carlingford line on weekends
- Revised Standby train arrangements
- Stabling of sets at Leppington & Auburn Stabling Yards
- Increased Waratah running
- Revised Crew Training train arrangements at Campbelltown and Auburn Stabling Yard
- Minor passenger time alterations on selected services at various stations
- Altered timing and routing of selected Sector 3 services between Homebush and St Marys
- Revised running times for Blue Mountain services
- Sutherland platform working alterations
- Mechanised Track Patrol and South Coast Hi-Rail alterations
- Kiama platform working alterations

Continued on the next page

Continued from the previous page

- Amended consist of Indian Pacific to reflect current length

All staff concerned are to familiarise themselves with the contents of the Standard Working Timetable 2013 Rail Passenger Services Version 4.00, (141212), as applicable to their role prior to introduction. Queries should be directed to your Supervising Officer for referral to the relevant divisional timetable planning representative or the Operations Readiness & Special Events Manager.

LAWSON (WEST): RELOCATION OF LN64 SIGNAL

Commencing at 0700 hours **Saturday 10 January 2015**, and continuing until 1730 hours on Sunday 11 January 2015, the following work will be carried out:

- Existing signal LN64 will be removed and replaced with a new signal position 5 metres towards Sydney at 97.784 km.
- A turnout repeater will be provided on the new signal but will not be brought into use at this stage.

HAMILTON – SPEED SIGN CHANGES

As per WN 49, 50 & 51 – 2014 the Newcastle Line will be truncated at 165.488km

On **Tuesday, 6 January 2015**, the following work will be carried out on the Newcastle Line at Hamilton:

- At 164.395km on the Up Main for trains travelling towards Newcastle, an 80km/h speed board will be removed and replaced with a 25km/h.
- At 164.743km on the Up Main for trains travelling towards Newcastle, a 13km/h yard speed board will be installed.
- At 164.555km on the Down Main for trains travelling to Sydney, a 75km/h speed board will be installed.

NEWNES JUNCTION (WEST) – REMOVAL OF 26 CROSSOVER

Commencing at 0200 hours on **Saturday, 10 January 2015**, and continuing until 0200 hours on Monday 12 January 2015, the following work will be carried out:

- Crossover 26 will be removed.
- Lever 26 in the Signal Box will be secured in the normal position and the lever nameplate removed.
- The Indication Diagram will be amended to the altered work.

REQUESTS FOR NETWORK MANUALS AND FORMS

Please regularly check that your Network Manuals and Forms are up to date and include the current status sheet numbers for each section, as listed in this Weekly Notice.

If your manuals do not have the correct status sheets, they have not been properly amended and the Safeworking information will not be up to date.

All Sydney Trains staff issued with Network Manuals and who require regular updates and amendments need to contact their relevant distribution officer, as listed in this Weekly Notice, to have their name and contact details included in the distribution list. This will ensure that you receive all updated Network Manuals and Forms.

All requests to receive Safeworking documentation must be forwarded through your controlling officer to the appropriate distribution officer.

Those outside Sydney Trains can access Safeworking information by visiting the RailSafe website at www.railsafe.org.au

External users who wish to purchase hard copies of the Network Rules and Network Procedures can download an order form from the RailSafe website under Contractors on the top menu bar.

DISTRIBUTION OFFICERS

Sydney Trains

Safety and Environment

Maria Economou

Safety Support

Tel: 2 4502 Fax: 2 1840

Email: Maria.Economou@transport.nsw.gov.au
