

DOCUMENT NO.	D2022/2818
WORK DESCRIPTION	Routine Network Maintenance Activities
WPP Number	SC8B 10120
SCOPE:	This SWI is applicable for the worksite protection arrangements using lookout working concerning routine network maintenance, defect management and repair of assets within the limits specified below and in the attached plan.
	Work activities include:  • Routine preventative and corrective work such as inspections and maintenance as appropriate for the type of protection being applied as part of this plan.
AUTHORISATIONS:	Protection Officer: Protection Officer Level 1 or higher  Lookout: Engineering Hand signaller Level 1 or higher or Protection Officer Level 1 or higher.
SAFETY CONTROLS: Lookout working arrangements	The nominated worksite location for Lookout Working is a fixed worksite and includes the Up Illawarra  Main Line between WG 605 U and WG 604 U and the Down Illawarra Main Line between WG 603 D and  WG 602 D  The Protection Officer must:  • Establish Lookouts as required to watch for approaching rail traffic from all entry points  • Designate and instruct which safe places the workers are to use as the work is completed along the work route within the worksite limits.
PRESTART REQUIREMENTS:	Protection Officer assessment checklist must be completed before instructions in this SWI are followed.  Tools and equipment required:  Protection Officer requires a phone to contact the Signaller.  Lookouts require a high-visibility arm sleeve and a whistle/horn.
FURTHER INFORMATION:	NWT 300 Planning work in the Rail Corridor  NWT 310 Lookout Working  NPR 711 Using Lookouts  NPR 751 Calculating Minimum Warning Time  NPR 712 Protecting work from rail traffic on adjacent lines  NGE 200 Walking in the Danger Zone  NLA 320 Broadmeadow - Newcastle Interchange  Lookout Working Prohibited Locations Register  NLA 410 Sutherland to Wollongong

### **Worksite Protection Pre-work Briefing**

				Briefing date:	1 1
<b>Protection Officer</b>	details				
	name		signature		contact No.
Work location:	Coledale				
Scope of work:	Routine Network Mair	ntenance Activities			
Worksite protection	on: Lookout Working			Refer to Worksite	Protection Plan for details

<b>Hazards</b> (e.g. Site specific hazards identified, including physical environment, human errors, plant and equipment)	Controls (to be implemented to eliminate or reduce the risk to the lowest practicable level)	Person responsible for Control
	Lookouts must be trained and competent to perform lookout duties.	
	Lookouts must be rotated if performing lookout for extended periods of time	Protection Officer
Approaching rail traffic	Workers to remain within worksite limits as set out in this procedure.	and Lookout
	Lookouts must be placed as per protection plan on page 8.	Lookout
	Workers are to stop work and move to a safe place immediately on being warned by the lookouts	
Live adjacent lines	Lookouts must provide warning to workers when rail traffic is approaching from the adjacent line in either direction.	Protection Officer and Lookout
Two - way running / multiple entry points into worksite	One Lookout placed watching each direction before work starts. Lookouts are to warn workers of approaching rail traffic, including rail traffic entering or travelling within the worksite. Workers are to stop work and move to a safe place.	Protection Officer and Lookout
Obstruction to Minimum Sighting Distance	Lookouts must provide warning to the workers whenever their line of sight is obstructed by passing rail traffic. Workers must stop work and move to a safe place and reassess positioning and method	Protection Officer and Lookout
Adjoining/Surrounding Worksites	Lookouts must have two independent audible warning devices that can be heard by workers over any noise generated by adjoining/surrounding worksites.	Protection Officer and Lookout
	Lookouts are to provide warning if their line of sight is obstructed by adjoining/surrounding worksites.	
Access to / Egress from worksite	Access and egress points must be agreed prior to entering the danger zone, consideration should be given to ease of access and safest possible entry and exit points.	All
Slips, trips, falls and hazards carrying equipment	Protection Officer will assess and instruct when it is safe for workers to use NGE 200 Walking in the Danger Zone to move to the worksite or safe place.	

Mobile phone	Mobile phones use is not permitted in the danger zone unless being used by maintenance staff for critical maintenance communications or recording of defects.	All

Diagrams, notes, and detailed instructions are over the next pages. These are to be read and followed as part of this worksite protection plan for Lookout Working.

## **Lookout Working Worksite Protection for Coledale Routine Network Maintenance Activities**

#### INSTRUCTIONS:

- 1. Workers enter the rail corridor via gate 100 68.188 U off Park Avenue at Austinmer
- 2. Protection Officer briefs workers about the worksite protection arrangements.
- 3. Protection Officer contacts Wollongong North Panel and tells the Signaller about the use of Lookout Working.
- 4. Establish Lookouts at designated locations.
- 5. Workers start work up to designated locations.
- 6. Workers move to safe place.
- 7. Re-establish Lookouts at next designated location.
- 8. Repeat steps 6-8 until work is complete.
- 9. Workers move to a safe place.
- 10. Recall lookouts.
- 11. Workers egress the worksite via 100 68.188 U off Park Avenue at Austinmer
- 12. Protection Officer contacts Wollongong North Panel to end Lookout Working.

### ADDITIONAL DETAILS

#### Obstruction to Minimum Sighting Distance

Stabled rail traffic on any tracks and conditions on the day may obstruct minimum sighting distance. When this hazard is identified, workers must stop work and move to a safe place until the Protection Officer makes an assessment and relocates lookouts to achieve the required minimum sighting distance.

#### **LOOKOUTS**
