# **Lookout Working Worksite Protection for Meeks Road Junction routine** network maintenance activities

DOCUMENT NO.	D2022/3710
WORK DESCRIPTION	Routine network maintenance activities – Meeks Road Junction – lookout working (moving worksite)
WPP Number	CS8B 10088
SCOPE:	This SWI is applicable for the worksite protection arrangements using lookout working concerning routine network maintenance, defect management and repair of assets within the limits specified below and in the attached plan.
	Work activities include:  Routine preventative and corrective work such as inspections and maintenance as appropriate for the type of protection being applied as part of this plan.
AUTHORICATIONS.	Protection Officer: Protection Officer Level 1 or higher
AUTHORISATIONS:	<b>Lookout:</b> Engineering Hand signaller Level 1 or higher or Protection Officer Level 1 or higher.
SAFETY CONTROLS – Lookout Working	The nominated worksite location for Lookout Working includes all tracks within Meeks Road between 760 Points to CR 711 Signal and Clear of 747 Points.  The nominated worksite location for Lookout Working is a moving worksite, where workers are working clear the track within the limits of the populated worksite location up to the whore the Lookout is
arrangements:	along the track within the limits of the nominated worksite location up to the where the Lookout is established.
	As work moves along the track, the Protection Officer must assess the new location and:
	Establish Lookouts as required to watch for approaching rail traffic from all entry points
	<ul> <li>Designate and instruct which safe places the workers are to use as the work is completed along the work route within the worksite limits.</li> </ul>
	Protection Officer assessment checklist must be completed before instructions in this SWI are followed.
PRESTART	Tools and equipment required:
REQUIREMENTS:	Protection Officer requires a phone to contact the Signaller.
	<ul> <li>Lookouts require a high-visibility arm sleeve and a whistle/horn.</li> </ul>

Work location:	Me	eks Road Junction	on				
Scope of work:	Ro	outine network ma	intenance activities				
Worksite protecti	on:	Lookout Workin	g		Refer to Worksite	e Protection Pla	an for details

vvorksite protection.		
Hazards (e.g. Site specific hazards identified, including physical environment, human errors, plant and equipment)	Controls (to be implemented to eliminate or reduce the risk to the lowest practicable level)	Person responsible for Control
Struck by rail traffic	Lookouts must be trained and competent to perform lookout duties.  Lookouts must be rotated if performing lookout for extended periods of time  Workers to remain within worksite limits as set out in this procedure.  Lookouts must be placed as per protection plan on page 8.  Workers are to stop work and move to a safe place immediately on being warned by the lookouts	Protection Officer and Lookout
Live adjacent lines	Lookouts must provide warning to workers when rail traffic is approaching from the adjacent line in either direction.	Protection Officer and Lookout
Two - way running / multiple entry points into worksite	One Lookout placed watching each direction before work starts. Lookouts are to warn workers of approaching rail traffic, including rail traffic entering or travelling within the worksite. Workers are to stop work and move to a safe place.	Protection Officer and Lookout
Obstruction to Minimum Sighting Distance	Lookouts must provide warning to the workers whenever their line of sight is obstructed by passing rail traffic. Workers must stop work and move to a safe place and reassess positioning and method	Protection Officer and Lookout
Adjoining/Surrounding Worksites	Lookouts must have two independent audible warning devices that can be heard by workers over any noise generated by adjoining/surrounding worksites.  Lookouts are to provide warning if their line of sight is obstructed by adjoining/surrounding worksites.	Protection Officer and Lookout
Access to / Egress from worksite	Access and egress points must be agreed prior to entering the danger zone, consideration should be given to ease of access and safest possible entry and exit points.	All
Slips, trips, falls and hazards carrying equipment	Protection Officer will assess and instruct when it is safe for workers to use NGE 200 Walking in the Danger Zone to move to the worksite or safe place.	
Mobile phone	Mobile phones use is not permitted in the danger zone unless being used by maintenance staff for critical maintenance communications or recording of defects.	All

Diagrams, notes, and detailed instructions over the next pages. These are to be read and followed as part of this worksite protection plan for Lookout working.

# Lookout Working Worksite Protection for Meeks Road Junction routine network maintenance activities

#### INSTRUCTIONS:

- 1. Workers enter rail corridor via access gate M52 6.037 U off Carrington Street, or via F Frame at XPT service
- 2. Protection Officer contacts **Sydenham Panel** and tells the Signaller about the use of Lookout Working on All tracks within Meeks Road Junction.
- For works between Carrington Road Level crossing and CR 711 Signal, follow steps 5-15. For works elsewhere
  in Meeks Road Junction follow steps 16-18.
- 4. Protection Officer briefs workers and lookouts on protection arrangements
- 5. Protection Officer places Lookouts watching for rail traffic approaching in both directions at the designated locations.
- 6. Lookout to walk adjacent to Up Goods line through the bridge to SM 710 Signal under NGE200.
- Second lookout stands at SM 701 Signal, to watch for approaching trains from the North Folk and the Goods line from Tempe end.
- 8. Workers start work up to the position of the lookout at SM 710 Signal.
- 9. Workers move to a designated safe place.
- 10. Lookout at **SM 710 Signal** to relocates to **CR 711 Signal**. Second lookout relocates to **CR 710 Signal** to watch for approaching trains coming from North Folk and Goods Line from Tempe.
- 11. Workers re-commence work up to the position of the lookout at Signal CR 711 Signal and then turn back around and work towards the lookout at SM 710 Signal.
- 12. Workers move to a designated safe place.
- Lookout at CR 710 Signal to relocate to SM 701 Signal and lookout at CR 711 Signal to relocate back to SM 710 Signal
- 14. Workers to recommence work up to position of the lookout at SM 701 Signal.
- 15. Workers moved to a designated safe place.
- 16. Re-establish Lookouts at next designated location
- 17. Workers start work up to designated locations.
- 18. Workers move to a safe place.
- 19. Repeat steps 16 18 until work is completed.
- 20. Recall Lookouts
- 21. Egress via M52 6.037 U Carrington Street gate.
- 22. Protection Officer contacts the Signaller at Sydenham Panel to end Lookout Working.

# ADDITIONAL DETAILS

### Obstruction to Minimum Sighting Distance

Stabled rail traffic may obstruct the Lookouts minimum sighting distance requirements. When this hazard is identified, workers must stop work and move to a safe place until the Protection Officer makes an assessment and repositions Lookouts to achieve the required Minimum Sighting Distance.

### Safe Places under bridge

Manholes are located throughout the underpass. Safe places have limited space for a maximum of 2 people. The Protection Officer must designate which manholes are to be used by whom when the lookout warns of approaching rail traffic.

# Multiple entry points

Tracks are to be treated as bidirectional. Lookouts are placed to watch for rail traffic approaching from both directions and all points of entry into the worksite Rail traffic movements on other tracks may also obstruct minimum sighting distance requirements. When this is identified, workers must stop work and move to a safe place until the Protection Officer makes an assessment and repositions Lookouts to achieve the required Minimum Sighting Distance.
