

DOCUMENT NO.	D2022/3702
WORK DESCRIPTION	Routine network maintenance activities- Wolli Creek junction (moving worksite)
WPP Number	CS17B 12798
SCOPE:	This SWI is applicable for the worksite protection arrangements using lookout working concerning routine network maintenance, defect management and repair of assets within the limits specified below and in the attached plan.  Work activities include:
	<ul> <li>Routine preventative and corrective work such as inspections and maintenance as appropriate for the type of protection being applied as part of this plan.</li> </ul>
	Protection Officer: Protection Officer Level 1 or higher
AUTHORISATIONS:	<b>Lookout:</b> Engineering Hand signaller Level 1 or higher or Protection Officer Level 1 or higher.
SAFETY CONTROLS – Lookout Working	The nominated worksite location for Lookout working includes the Up and Down Illawarra Local and Up and Down Illawarra line between SM 651 I Signal to SM 801 I Signal as well as inclusive of the Up and Down East Hills Line to SM 674 EH Signal.
arrangements:	The nominated worksite location for Lookout Working is a moving worksite, where workers are working along the track within the limits of the nominated worksite location up to the where the Lookout is established.
	As work moves along the track, the Protection Officer must assess the new location and:
	Establish Lookouts as required to watch for approaching rail traffic from all entry points
	<ul> <li>Designate and instruct which safe places the workers are to use as the work is completed along the work route within the worksite limits.</li> </ul>
PRESTART	Protection Officer assessment checklist must be completed before instructions in this SWI are followed.  Tools and equipment required:
REQUIREMENTS:	Protection Officer requires a phone to contact the Signaller.
	Lookouts require a high-visibility arm sleeve and a whistle/horn.

### **Worksite Protection Pre-work Briefing**

			Briefing date:	1 1
<b>Protection Office</b>	r Details			
	name	signature	Э	contact No.
Work location:	Wolli Creek Junction			
Scope of work:	Routine network maint	enance activities		
Worksite protecti	on: Lookout Working		Refer to Worksite	Protection Plan for details

Hazards (e.g., Site specific hazards identified, including physical environment, human errors, plant and equipment)	Controls (to be implemented to eliminate or reduce the risk to the lowest practicable level)	Person responsible for Control
	Lookouts must be trained and competent to perform lookout duties.	
	Lookouts must be rotated if performing lookout for extended periods of time	Protection Office
Approaching rail traffic	Workers to remain within worksite limits as set out in this procedure.	& Lookout
	Lookouts must be placed as per protection plan on page 8.	2001.04.
	Workers are to stop work and move to a safe place immediately on being warned by the lookouts	
Live adjacent lines	Lookouts must provide warning to workers when rail traffic is approaching from the adjacent line in either direction.	Protection Officer & Lookout
Two - way running / multiple entry points into worksite	One Lookout placed watching each direction before work starts. Lookouts are to warn workers of approaching rail traffic, including rail traffic entering or travelling within the worksite. Workers are to stop work and move to a safe place.	Protection Officer & Lookout
Obstruction to Minimum Sighting Distance	Lookouts must provide warning to the workers whenever their line of sight is obstructed by passing rail traffic. Workers must stop work and move to a safe place and reassess positioning and method	Protection Office & Lookout
Adjoining/Surrounding Worksites	Lookouts must have two independent audible warning devices that can be heard by workers over any noise generated by adjoining/surrounding worksites.	Protection Office
Adjoining/ourrounding Promotion	Lookouts are to provide warning if their line of sight is obstructed by adjoining/surrounding worksites.	& Lookout
Access to / Egress from worksite	Access and egress points must be agreed prior to entering the danger zone, consideration should be given to ease of access and safest possible entry and exit points.	All
Slips, trips, falls and hazards carrying equipment	Protection Officer will assess and instruct when it is safe for workers to use NGE 200 Walking in the Danger Zone to move to the worksite or safe place.	
Mobile phone	Mobile phones use is not permitted in the danger zone unless being used by maintenance staff for critical maintenance communications or recording of defects.	All

# Lookout Working Worksite Protection for Wolli Creek Junction routine network maintenance activities

### **INSTRUCTIONS:**

- Workers enter rail corridor via double access gate (100 7.566 U) off Lusty Street Upside or via (100 7.542 D) gate opposite Magdalene Street on the Downside
- 2. Protection Officer briefs workers about the worksite protection arrangements.
- Protection Officer contacts Wolli Creek Panel and tells the Signaller about the use of Lookout Working on all tracks at Wolli creek Junction from SM 651 I Signal to SM801 I Signal on the Illawarra line and to SM 674 EH Signal on the East Hills line.
- 4. Establish Lookouts at designated locations.
- 5. Workers start work up to designated Lookouts location.
- 6. Workers move to a safe place.
- 7. Re-establish Lookouts at next designated location.
- 8. Repeat steps 4-6 until work is complete work.
- 9. Workers move to a safe place.
- 10. Recall Lookouts
- Workers egress the worksite via double gate (100 7.566 U) off Lusty Street Upside or via (100 7.542 D) gate opposite Magdalene Street on the Downside.
- 12. Protection Officer contacts the Signaller at Wolli Creek Panel to end Lookout Working.

# ADDITIONAL DETAILS

### **Sighting Distance**

An Additional Lookout must be used for works around **754 points** on the **Up Illawarra Local** to achieve the sighting distance. An Additional Lookout must be placed between 7.324kms and 7.355kms between the Up and Down East Hills watching for approaching rail traffic on the Up East Hills line.

### Multiple entry points

When work is to be conducted around **755** and **756 points**, be aware that trains crossing through **755** points will cross through the **Up Illawarra** in the **Down direction** and trains crossing through **756 points** will cross through the **Down Illawarra Local** in the **Up direction**. If working around **753 points** be aware that trains may cross the **Up Illawarra Local** in the **Down direction** through **753 points**. Adequate Lookouts must be placed to ensure workers are warned and moved to the safe place in accordance with the Minimum Warning Time Calculation.

### **Lookout Working Prohibited Locations**

There are multiple Lookout Working Prohibited Locations near to the work area. Higher form of protection required if working in the following locations.

- Lookout working is prohibited on the Up & Down Illawarra between 6.997 to 7.092kms.
- Lookout working is prohibited on the Down Illawarra between 7.707 to 7.800kms
- Lookout working is prohibited on the Up and Down Airport Line between 0.660 to 10.500kms.

**NOTE:** Kms on the Up and Down Airport Line are different from the Up and Down East Hills Line kms.
