

7

weekly notice

Monday, 16 February 2015
Sunday, 22 February 2015

Safeworking information, such as Weekly Notices and SAFE Notices, is available on the RailSafe website.

By accessing Weekly Notices and SAFE Notices online, you will receive safety information more quickly. Weekly Notices remain on the RailSafe website for two years; Permanent and Temporary SAFE Notices remain online as long as they are current.

Anyone needing back issues of Weekly Notices and SAFE Notices should contact the Network Rules unit.

If you are outside Sydney Trains, you can reach the RailSafe website via the following address:

www.railsafe.org.au

Other Safeworking documents, such as Network Rules, Network Procedures, Network Local Appendices, Safeworking Policies, SafeTracks flyers, and contractor information are also available online.

PUBLICATION DEADLINES AND SUBMISSION OF ARTICLES

Dates of the next five Weekly Notices and deadlines for articles are:

Weekly Notice	For Week	Deadline
8	23/2/15–1/3/15	27/1/15
9	2/3/15–8/3/15	3/2/15
10	9/3/15–15/3/15	10/2/15
11	16/3/15–22/3/15	17/1/15

So that printing and distributing schedules can be met, it is essential articles are received by the deadline.

Late articles will be published in the next issue of the Weekly Notice. This may result in information not being distributed in time for it to be acted upon.

When submitting articles, please include your name, position title, telephone numbers and email details at the end of the articles as shown below:

TRAIN EXAMINATIONS – EXTRA PRECAUTIONS DURING THE WOLO RISK PERIOD (OCTOBER TO MARCH)

ATTENTION: All train examiners

Rollingstock can contribute to track buckles.

Between October to March each year, higher temperatures increase the risk of track buckles on welded track due to expansion of the rails.

Rollingstock with poorly tracking or hunting bogies can apply additional lateral force to the rails that disturb the track structure under these conditions. This can contribute to track buckling under a train or after the passage of a train.

Train examinations: Passenger and freight trains

To reduce the track buckling forces from rollingstock, the following components should be inspected more closely during the WOLO risk period:

Constant contact side bearers (where fitted)

Check for wear of non-metallic components, and that the side bearers are seating correctly with no gap (see Figure 2). This applies mainly to freight, but also applies to passenger rollingstock such as NHA bogies under XPT and J type bogies under L, R, S, K and C sets.

Friction wedges

Check for excessive wedge rise, condemn notch thickness, and wear plate condition.

Wheel profiles

Check for excessive flange wear and arises.

Overloading or unbalanced loading

Check For spring deflection, obviously incorrect loading of wagon including over decks of multipack wagons.

Continued on the next page

Evidence of hunting

Tell-tale signs of hunting are any of the following:

- fresh bolster gib wear (see Figure 1)
- wear between the side of the friction wedge and bolster pocket (see Figure 1)
- fresh wear between the axle box or the bearing adaptor and bogie side frame
- melting of plastic elements in the constant contact side bearers due to friction heating (see Figure 3).

Freight wagons with the following hunting defects should be marked off, or reduced to 50km/h maximum speed, when a WOLO has been declared.

Figure 1: High gib/side frame wear and friction wedge lateral wear

Figure 2: Constant contact side bearer with point contact

Figure 3: Constant contact side bearers with melted plastic blocks

What to do if defects are detected or reported

Defects are usually identified via passenger complaints (for passenger trains), and drivers and wayside staff reports and observations, including roll-by inspections (for freight trains).

Any passenger vehicle, freight train or locomotive should undergo corrective action if suspected of hunting.

Freight vehicles showing any of the above defects should be marked off, or operate at reduced speed until corrective action is taken.

The reduced speed shall be the maximum permitted track speed not exceeding 50km/h when a WOLO has been declared.

The reduced speed when a WOLO has been declared is published in the Train Operating Conditions Manual General Instruction Pages, Section 3 Page 5.

Note: These items form part of the normal train examination procedures, but are especially important at this time of year when track buckles are a greater risk. Please refer to your examiners manuals for the inspection procedure and limits for these components and, if you have any questions, speak with your supervisor.

TRACK DISTURBANCE BETWEEN OCTOBER AND MARCH

ATTENTION: All engineering and construction staff who work on or about the track

Disturbance of the track during the period October to March can cause track misalignments (track buckles).

Be aware of:

- Bumping of the track (e.g bumping the track with a front-end loader).
- Knocking down or removing ballast profile (e.g running along the ballast shoulder in a truck).
- Undermining the ballast profile by excavation (e.g excavating a trench beside or under the track).

Report all track disturbances

If the track is disturbed, report it immediately to local track staff.

Planned work to be advised to email address PermissionToDisturb@transport.nsw.gov.au

Graham McGrath

A/Manager - Track Engineering Unit

MOUNT VICTORIA (WEST) – DOWN SIDINGS REMOVAL OF X AND Y KEYS

Since **Saturday, 10 January 2015**, the following work has been carried out.

- The X and Y Annett Locks and Keys interlocking the overhead isolating switch W72/11 have been removed from structure SL126+943. An electrical representative is required for removal or restoration of power to the Down Goods Siding and Shunting Neck as required by NLA 216.
- Signals 7 and 36 remain booked out of use. 8 Points, and the Down Goods Siding and Shunting Neck also remain booked out of use for all movements excepting track vehicles.

KIAMA – BERRY (ILLAWARRA) – REMOVAL OF FERN ST LEVEL CROSSING

Since **Friday, 13 February 2015**, the following work has been carried out.

In conjunction with the opening of Omega Bridge road overpass, Fern Street Level Crossing (126.454 km) has been closed to the public and the warning equipment permanently booked out of use.

The Level Crossing warning equipment will be progressively removed.

GOSFORD PASSING LOOPS PROJECT – GOSFORD – NARARRA

Since **Monday, 26 January 2015**, 1500V overhead wiring became LIVE over the "NEW" Down Refuge line between 81.500 km to 83.700 km (OHW structures N81+572 to N83+599).

All persons are to be informed that the overhead wiring is to be treated as "live" and work must not be undertaken in the vicinity of the 1500V overhead equipment where there is danger of contact or the possibility of electrical clearance being breached, unless a "Permit to Work" form has been issued in accordance with Electrical Safety Instructions.

If "Permit to Work" forms are required or doubt exists if you require one while working in this area, contact EI-C@transport.nsw.gov.au for details.

Greg Barnes

Senior Project Manager

Gosford Passing Loops Project

HURSTVILLE (ILLAWARRA) – RELOCATION OF SIGNAL SM945UIL AND CONVERSION OF 991A/B POINTS TO D84M WITH SPHEROLOCK MECHANISM

Since **Monday, 9 February 2015**, the following work was carried out:

Signal SM945UIL and associated equipment was relocated approximately 86m towards Sydney to 15.448 km. All signal lamps were upgraded to LED type.

The existing 991A catch point on the Up Illawarra Local and 991B points on the Up Illawarra Main was renewed. The point mechanisms were replaced with D84M MkIII point machines utilising an in-bearer Spherolock arrangement.

991A catch point was relocated approximately 36m towards Sydney to 15.506 km.

991B points was relocated approximately 1m towards Sydney to 15.622 km.

An Emergency Operations Lock (EOL) with associated keys was provided to replace the existing Emergency Switch Machine Lock (ESML).

REQUESTS FOR NETWORK MANUALS AND FORMS

Please regularly check that your Network Manuals and Forms are up to date and include the current status sheet numbers for each section, as listed in this Weekly Notice.

If your manuals do not have the correct status sheets, they have not been properly amended and the Safeworking information will not be up to date.

All Sydney Trains staff issued with Network Manuals and who require regular updates and amendments need to contact their relevant distribution officer, as listed in this Weekly Notice, to have their name and contact details included in the distribution list. This will ensure that you receive all updated Network Manuals and Forms.

All requests to receive Safeworking documentation must be forwarded through your controlling officer to the appropriate distribution officer.

Those outside Sydney Trains can access Safeworking information by visiting the RailSafe website at www.railsafe.org.au

External users who wish to purchase hard copies of the Network Rules and Network Procedures can download an order form from the RailSafe website under Contractors on the top menu bar.

DISTRIBUTION OFFICERS

Sydney Trains

Safety and Environment

Maria Economou

Safety Support

Tel: 2 4502 Fax: 2 1840

Email: Maria.Economou@transport.nsw.gov.au
