

46

weekly notice

Monday, 17 November 2014
Sunday, 23 November 2014

Safeworking information, such as Weekly Notices and SAFE Notices, is available on the RailSafe website.

By accessing Weekly Notices and SAFE Notices online, you will receive safety information more quickly. Weekly Notices remain on the RailSafe website for two years; Permanent and Temporary SAFE Notices remain online as long as they are current.

Anyone needing back issues of Weekly Notices and SAFE Notices should contact the Network Rules unit.

If you are outside Sydney Trains, you can reach the RailSafe website via the following address:

www.railsafe.org.au

Other Safeworking documents, such as Network Rules, Network Procedures, Network Local Appendices, Safeworking Policies, SafeTracks flyers, and contractor information are also available online.

PUBLICATION DEADLINES AND SUBMISSION OF ARTICLES

Dates of the next four Weekly Notices and deadlines for articles are:

Weekly Notice	For Week	Deadline
47	24/11/14–30/11/14	11/11/14
48	1/12/14–7/12/14	18/11/14
49	8/12/14–14/12/14	25/11/14
50	15/12/14–21/12/14	2/12/14

So that printing and distributing schedules can be met, it is essential articles are received by the deadline.

Late articles will be published in the next issue of the Weekly Notice. This may result in information not being distributed in time for it to be acted upon.

When submitting articles, please include your name, position title, telephone numbers and email details at the end of the articles as shown below:

TRAIN EXAMINATIONS – EXTRA PRECAUTIONS DURING THE WOLO RISK PERIOD (OCTOBER TO MARCH)

ATTENTION: All train examiners

Rollingstock can contribute to track buckles.

Between October to March each year, higher temperatures increase the risk of track buckles on welded track due to expansion of the rails.

Rollingstock with poorly tracking or hunting bogies can apply additional lateral force to the rails that disturb the track structure under these conditions. This can contribute to track buckling under a train or after the passage of a train.

Train examinations: Passenger and freight trains

To reduce the track buckling forces from rollingstock, the following components should be inspected more closely during the WOLO risk period:

Constant contact side bearers (where fitted)

Check for wear of non-metallic components, and that the side bearers are seating correctly with no gap (see Figure 2). This applies mainly to freight, but also applies to passenger rollingstock such as NHA bogies under XPT and J type bogies under L, R, S, K and C sets.

Friction wedges

Check for excessive wedge rise, condemn notch thickness, and wear plate condition.

Wheel profiles

Check for excessive flange wear and arises.

Overloading or unbalanced loading

Check For spring deflection, obviously incorrect loading of wagon including over decks of multipack wagons.

Continued on the next page

Evidence of hunting

Tell-tale signs of hunting are any of the following:

- fresh bolster gib wear (see Figure 1)
- wear between the side of the friction wedge and bolster pocket (see Figure 1)
- fresh wear between the axle box or the bearing adaptor and bogie side frame
- melting of plastic elements in the constant contact side bearers due to friction heating (see Figure 3).

Freight wagons with the following hunting defects should be marked off, or reduced to 50km/h maximum speed, when a WOLO has been declared.

Figure 1: High gib/side frame wear and friction wedge lateral wear

Figure 2: Constant contact side bearer with point contact

Figure 3: Constant contact side bearers with melted plastic blocks

What to do if defects are detected or reported

Defects are usually identified via passenger complaints (for passenger trains), and drivers and wayside staff reports and observations, including roll-by inspections (for freight trains).

Any passenger vehicle, freight train or locomotive should undergo corrective action if suspected of hunting.

Freight vehicles showing any of the above defects should be marked off, or operate at reduced speed until corrective action is taken.

The reduced speed shall be the maximum permitted track speed not exceeding 50km/h when a WOLO has been declared.

The reduced speed when a WOLO has been declared is published in the Train Operating Conditions Manual General Instruction Pages, Section 3 Page 5.

Note: These items form part of the normal train examination procedures, but are especially important at this time of year when track buckles are a greater risk. Please refer to your examiners manuals for the inspection procedure and limits for these components and, if you have any questions, speak with your supervisor.

TRACK DISTURBANCE BETWEEN OCTOBER AND MARCH

ATTENTION: All engineering and construction staff who work on or about the track

Disturbance of the track during the period October to March can cause track misalignments (track buckles).

Be aware of:

- Bumping of the track (e.g bumping the track with a front-end loader).
- Knocking down or removing ballast profile (e.g running along the ballast shoulder in a truck).
- Undermining the ballast profile by excavation (e.g excavating a trench beside or under the track).

Report all track disturbances

If the track is disturbed, report it immediately to local track staff.

Planned work to be advised to email address PermissionToDisturb@transport.nsw.gov.au

SHELLHARBOUR JUNCTION STATION OPENING / DUNMORE(SHELLHARBOUR) STATION CLOSURE

The opening date of Shellharbour Junction station as advertised in Weekly Notice 43 & 44 has now been changed to 22 November 2014.

Commencing from the first train on **Saturday, 22 November 2014**, the new station at Shellharbour Junction, located at 108.890km to 109.080km on the Main Illawarra Line and the Dunmore Loop, will be brought into service and open to the public. All trains will stop as tabled in STN1688 – 2014 at the new station. The station will not be staffed during normal operations.

- There is a new Guards indicator located on each platform of the station.
- At the same time, Dunmore (Shellharbour) Station will be no longer be in service and trains will no longer stop at that station, as detailed in STN 2015 – 2014. The site of Dunmore (Shellharbour) station will be secured to prevent public access from this time, but will not be demolished immediately. This portion of the project is still being developed and further advice will be provided at a later date.
- The pedestrian level crossing located at 110.750km on the Country end of the closed Dunmore Station platforms will remain unaltered and in use.
- The mimic panel located at the Wollongong Signal Complex will be altered to show the changes.

SHELLHARBOUR JUNCTION – GUARDS INDICATORS

Since **Saturday, 15 November 2014** and continuing until completed, the following work will be carried out:

- Platform No 1 – Up Guards Indicator
- A new Up Direction LED type Guards Indicator will be brought into use to operate in conjunction with 28 signal.
- Platform No 2 – Up Guards Indicator
- A new Up Direction LED type Guards Indicator will be brought into use to operate in conjunction with 26 signal.
- Wollongong Control Panel will be altered to reflect the name change from Flinders to Shellharbour Junction.

REQUESTS FOR NETWORK MANUALS AND FORMS

Please regularly check that your Network Manuals and Forms are up to date and include the current status sheet numbers for each section, as listed in this Weekly Notice.

If your manuals do not have the correct status sheets, they have not been properly amended and the Safeworking information will not be up to date.

All Sydney Trains staff issued with Network Manuals and who require regular updates and amendments need to contact their relevant distribution officer, as listed in this Weekly Notice, to have their name and contact details included in the distribution list. This will ensure that you receive all updated Network Manuals and Forms.

All requests to receive Safeworking documentation must be forwarded through your controlling officer to the appropriate distribution officer.

Those outside Sydney Trains can access Safeworking information by visiting the RailSafe website at www.railsafe.org.au

External users who wish to purchase hard copies of the Network Rules and Network Procedures can download an order form from the RailSafe website under Contractors on the top menu bar.

DISTRIBUTION OFFICERS

Sydney Trains

Safety and Environment

Maria Economou

Safety Support

Tel: 2 4502 Fax: 2 1840

Email: Maria.Economou@transport.nsw.gov.au
