Sunday, 15 January 2017

RailSafe

See online for all Safeworking Information

www.railsafe.org.au

Safeworking information, such as Weekly Notices and SAFE Notices, is available on the RailSafe website.

By accessing Weekly Notices and SAFE Notices online, you will receive safety information more quickly. Weekly Notices remain on the RailSafe website for two years; Permanent and Temporary SAFE Notices remain online as long as they are current.

Anyone needing back issues of Weekly Notices and SAFE Notices should contact the Network Rules unit.

If you are outside Sydney Trains, you can reach the RailSafe website via the following address:

www.railsafe.org.au

Other Safeworking documents, such as Network Rules, Network Procedures, Network Local Appendices, Safeworking Policies, SafeTracks flyers, and contractor information are also available online.

PUBLICATION DEADLINES AND SUBMISSION OF ARTICLES

Dates of the next four Weekly Notices and deadlines for articles are:

Weekly Notice	For Week	Deadline
3	16/1/17–22/1/17	6/12/16
4	23/1/17–29/1/17	15/12/16
5	30/1/17–5/2/17	3/1/17
6	6/2/17–12/2/17	10/1/17

So that printing and distributing schedules can be met, it is essential articles are received by the deadline.

Late articles will be published in the next issue of the Weekly Notice. This may result in information not being distributed in time for it to be acted upon.

When submitting articles, please include your name, position title, telephone numbers and email details at the end of the articles as shown below:

TRAIN EXAMINATIONS – EXTRA PRECAUTIONS DURING THE WOLO RISK PERIOD (OCTOBER TO MARCH)

ATTENTION: All train examiners

Rollingstock can contribute to track buckles.

Between October to March each year, higher temperatures increase the risk of track buckles on welded track due to expansion of the rails.

Rollingstock with poorly tracking or hunting bogies can apply additional lateral force to the rails that disturb the track structure under these conditions. This can contribute to track buckling under a train or after the passage of a train.

Train examinations: Passenger and freight trains

To reduce the track buckling forces from rollingstock, the following components should be inspected more closely during the WOLO risk period:

Constant contact side bearers (where fitted)

Check for wear of non-metallic components, and that the side bearers are seating correctly with no gap (see Figure 2). This applies mainly to freight, but also applies to passenger rollingstock such as NHA bogies under XPT and J type bogies under S, K and C sets.

Friction wedges

Check for excessive wedge rise, condemn notch thickness, and wear plate condition.

Wheel profiles

Check for excessive flange wear and arises.

Overloading or unbalanced loading

Check For spring deflection, obviously incorrect loading of wagon including over decks of multipack wagons.

Continued on the next page

Evidence of hunting

Tell-tale signs of hunting are any of the following:

- fresh bolster gib wear (see Figure 1)
- wear between the side of the friction wedge and bolster pocket (see Figure 1)
- fresh wear between the axle box or the bearing adaptor and bogie side frame
- melting of plastic elements in the constant contact side bearers due to friction heating (see Figure 3).

Freight wagons with the following hunting defects should be marked off, or reduced to 50km/h maximum speed, when a WOLO has been declared.

Figure 1: High gib/side frame wear and friction wedge lateral wear

Figure 2: Constant contact side bearer with point contact

Continued on the next page

Figure 3: Constant contact side bearers with melted plastic blocks

What to do if defects are detected or reported

Defects are usually identified via passenger complaints (for passenger trains), and drivers and wayside staff reports and observations, including roll-by inspections (for freight trains).

Any passenger vehicle, freight train or locomotive should undergo corrective action if suspected of hunting.

Freight vehicles showing any of the above defects should be marked off, or operate at reduced speed until corrective action is taken.

The reduced speed shall be the maximum permitted track speed not exceeding 50km/h when a WOLO has been declared.

The reduced speed when a WOLO has been declared is published in the Train Operating Conditions Manual General Instruction Pages, Section 3 Page 5.

Note: These items form part of the normal train examination procedures, but are especially important at this time of year when track buckles are a greater risk. Please refer to your examiners manuals for the inspection procedure and limits for these components and, if you have any questions, speak with your supervisor.

TRACK DISTURBANCE BETWEEN OCTOBER AND MARCH

ATTENTION: All engineering and construction staff who work on or about the track

Disturbance of the track during the period October to March can cause track misalignments (track buckles).

Be aware of:

- Bumping of the track (e.g bumping the track with a front-end loader).
- Knocking down or removing ballast profile (e.g running along the ballast shoulder in a truck).
- Undermining the ballast profile by excavation (e.g excavating a trench beside or under the track).

Report all track disturbances

If the track is disturbed, report it immediately to local track staff.

Planned work to be advised to email address PermissionToDisturb@transport.nsw.gov.au

ARTARMON (NORTH SHORE) – UPGRADE AND RECONFIGURATION OF UP GUARDS INDICATORS ON PLATFORM 1

Commencing at 0200 hours on **Saturday, 21 January 2017** and concluding at 0200 hours on Monday, 23 January 2017 the following work will be carried out:

The two existing Guards Indicators on Platform 1, which operate in conjunction with SH6.38 signal, will be reconfigured as follows;

- The Guards Indicator facing the country direction will be upgraded to LED type. A new LED Guards Indicator facing the country end of the platform will be mounted on a post, 44 metres from the city end of Artarmon Platform 1.
- The existing city facing Guards Indicator will be removed.

GENERATION 4 TOM (TRAIN OPERATING MANUALS) WARATAH, MILLENIUM & OSCAR PRINT TO DIGITAL PUBLICATION

From **Sunday, 29 January 2017**, the Generation 4 Train Operating Manuals (TOM) for Waratah, Millenium and Oscar trains will be withdrawn as a hard copy publication from the Network Rules publications and will no longer be printed and distributed.

The TOMs will continue to be published as an online digital publication to the RailSafe website. Removing the hard copy TOMs will enable the TOM units to be updated individually and without the previously required lead time for printing and distribution of an entire TOM reprint or TOM Notice to capture any changes.

Any Waratah, Millenium and Oscar TOM units currently published on TOM notice will be incorporated into the digitally published TOM manuals and the TOM notices withdrawn.

From 29 January 2017 the hard copy publication of the Waratah, Millenium and Oscar TOMs will become obsolete and should therefore be destroyed. From this date any amendments to Waratah, Millenium and Oscar TOM units will be made directly to the digital version, TOM notices will for these documents will no longer be issued.

Where digital changes occurs, an advance electronic notification will be sent to all Train Crewing electronic device holders, and email sent via the normal Railsafe publications distribution process. This advice will provide a brief summary of the change and effective date.

KILLARA (NORTH SHORE) – UPGRADE AND RECONFIGURATION OF UP GUARDS INDICATORS ON PLATFORM 1

Commencing at 0700 hours on **Monday, 16 January 2017** and concluding at 1730 hours on Friday, 20 January 2017 the following work will be carried out:

The two existing Guards Indicators on Platform 1, which operate in conjunction with SH9.82 signal, will be reconfigured as follows;

- The country facing Guards Indicator will be upgraded to LED type and will remain in the same position.
- The city facing Guards Indicator will be removed.

LINDFIELD (NORTH SHORE) – UPGRADE AND RECONFIGURATION OF GUARDS INDICATORS ON PLATFORMS 2 AND 3

Commencing at 0700 hours on **Monday, 16 January 2017** and concluding at 1730 hours on Monday, 20 January 2017 the following work will be carried out:

The two existing Guards Indicators on Platform 2, which operate in conjunction with LD4 signal, will be upgraded to LED type and will remain in the same position.

The two existing Guards Indicators on Platform 3, which operate in conjunction with SH9.15 signal, will be reconfigured as follows;

- The city facing Guards Indicator will be upgraded to LED type and will remain in the same position.
- The country facing Guards Indicator will be removed.

ROSEVILLE (NORTH SHORE) – UPGRADE AND RECONFIGURATION OF GUARDS INDICATORS ON PLATFORM 1 AND PLATFORM 2

Commencing at 0700 hours **Monday, 16 January 2017** until 1730 hours Friday, 20 January 2017 the following work will be carried out:

The two existing Guards Indicators on Platform 1 which operate in conjunction with SH8.20 signal, will be reconfigured as follows,

- The country facing Guards Indicator will be upgraded to LED type and will remain in the same position.
- The city facing Guards Indicator will be removed.

The country facing Guards Indicator on Platform 2 that operates in conjunction with SH8.33 signal will be removed.

TEMPE (ILLAWARRA) – RECONFIGURATION OF GUARD'S INDICATOR ARRANGEMENTS

Commencing at 0700 hours **Saturday 28 January 2017** and continuing until 1730 hours on Sunday 29 January 2017 the following work will be carried out:

Platform 2 Down Local Guard's Indicators

No.1 Guards Indicator will be relocated closer to the station building wall and renewed to LED type.

2 Guard's Indicator will be renewed to LED type in the same position.

Platform 4 Down Main Guard's Indicators

1 Guard's Indicator will be renewed to LED type in the same position.

2 Guard's Indicator will be relocated to a post-mounted position, rotated 180° to face Sydney and renewed to LED type.

NRF 017 Protection Officer's Diary	2	July 2014
NRF 018 Absolute Signal Blocking (ASB)	1	March 2016

REQUESTS FOR NETWORK MANUALS AND FORMS

Please regularly check that your Network Manuals and Forms are up to date and include the current status sheet numbers for each section, as listed in this Weekly Notice.

If your manuals do not have the correct status sheets, they have not been properly amended and the Safeworking information will not be up to date.

All Sydney Trains staff issued with Network Manuals and who require regular updates and amendments need to contact their relevant distribution officer, as listed in this Weekly Notice, to have their name and contact details included in the distribution list. This will ensure that you receive all updated Network Manuals and Forms.

All requests to receive Safeworking documentation must be forwarded through your controlling officer to the appropriate distribution officer.

Those outside Sydney Trains can access Safeworking information by visiting the RailSafe website at www.railsafe.org.au

DISTRIBUTION OFFICERS

Sydney Trains

Safety and Environment

Maria Economou

Safety Support

Tel: 2 4502 Fax: 2 1840

Email: Maria.Economou@transport.nsw.gov.au
