

ATWS Worksite Protection for Scarborough Routine Network Maintenance Activities

DOCUMENT NO.	D2021/27661
WORK DESCRIPTION	Routine Maintenance activities
WPP Number	SC4BWS 13223
SCOPE:	<p>Routine maintenance activities performed by the South Coast Maintenance team.</p> <ul style="list-style-type: none"> on the Up and Down Illawarra lines between 62.791 km to 63.021 km that does not involve the use of tools or equipment, or using tools which can be easily and immediately removed from the track by one person and are light, non-powered hand tools, or light battery powered tools or devices.
AUTHORISATIONS:	<p>Protection Officer, ATWS Operator (Operator) & ATWS Installer (Installer):</p> <ul style="list-style-type: none"> Protection Officer (PO) Level 1 – 4, and WATWS – Wireless Automatic Track Warning System <p>Dedicated Lookout: (PO) Level 1 - 4, or Handsignaller 1 - 2</p>
PERSONAL PROTECTIVE EQUIPMENT	<ul style="list-style-type: none"> High visibility vest, boots, high visibility lookout sleeve
SAFETY CONTROLS – Lookout Working (ATWS) arrangements:	<ul style="list-style-type: none"> Automatic Track Warning System (ATWS) - provides visual and audible warning for workers ATWS sensor for up direction running on the Up Illawarra line at 63.513 km ATWS sensor for up direction running on the Down line at 63.513 km ATWS sensor for down direction running on the Up Illawarra line at 62.400 km ATWS sensor for down direction running on the Down Illawarra line at 62.400 km Dedicated lookout(s) at the worksite for unsignalled movements. IMPORTANT! This document must not be used to install or adjust the ATWS sensors All sensors in the plan and shown on the diagram must be connected to transmit a warning
PRESTART REQUIREMENTS:	<ul style="list-style-type: none"> Refer to D2015-45354 Wireless ATWS (Automatic Track Warning System) to install or remove sensors <p>Tools and equipment required:</p> <ul style="list-style-type: none"> Protection Officer/Operator requires a phone to contact the Signaller. ATWS equipment (see Required ATWS equipment checklist) Digital radios (do not use GRN radios)
FURTHER INFORMATION:	<p>Refer to “D2015/45354 Wireless ATWS (Automatic Track Warning System)” for detailed instructions to set-up, connect, test and operate the ATWS system with pre-installed ATWS sensors</p> <p><i>NWT 300 Planning work in the Rail Corridor</i></p> <p><i>NWT 310 Lookout Working</i></p> <p><i>NGE 200 Walking in the Danger Zone</i></p> <p><i>NPR 711 Using Lookouts</i></p> <p><i>NPR 751 Calculating Minimum Warning Time</i></p> <p><i>NPR 712 Protecting work from rail traffic on adjacent lines</i></p> <p><i>NPR 752 Using Wireless Automatic Warning Systems</i></p> <p><i>NLA 410 Sutherland - Wollongong</i></p> <p><i>Lookout Working Prohibited Locations Register</i></p>

Required ATWS Equipment		
Item	Description	Quantity
Aerial	Telescopic Aerial	3
Assembly Kit	Orange Bag with Tools	2
Battery ZA24-2.9	Small battery for Junction Box & Transmitter	8
Device Frame	Protective Frame	3
F500-AB Junction Box	Receiver Device	4
F500-SEN Train Sensor	Sensor	4
Housing for Aerial	Housing for Telescopic Aerial	3
KF5-5 Extension Cable	Extension Cable (5m) for F500-SEN to F500-AB	2
Mobile Backpack	Harness for Device	0
Pouch	Pouch for small battery	4
Tripod	Tripod for Device	3
ZFS Radio Transmitter	Radio Transmitter Device	2
ZPW Warning Unit	Control & Warning Device	1

Protection Officer/Operator assessment checklist

Protection Officer's name:		Yes (Tick if Yes)
This document has not expired 12 months beyond the issue date.		
SWI details and protection arrangements have been reviewed and validated for the assessed worksite location, including: <ul style="list-style-type: none"> On-site safety assessment has been completed for relevancy of works being undertaken The required protection details, environment and tasks are unchanged from the details of this SWI All boxes have been ticked if applicable and crossed if not applicable All fields have been completed 		
Corridor Safety Number	Protection Officer Signature	Date

Warning

If an above item does not apply, the Protection Officer must not use this Safe Work Instruction. A new worksite protection plan must be completed in accordance with NRF 014 Worksite Protection Pre-work briefing and NRF 015 Worksite Protection Plan.

ATWS Worksite Protection for Scarborough Routine Network Maintenance Activities

Worksite Protection Pre-work Briefing

Briefing date:

Protection Officer details

name signature contact No.

Work location:

Scope of work:

Worksite protection: Refer to Worksite Protection Plan for details

Hazards (e.g. Site-specific hazards identified, including physical environment, human errors, plant and equipment)	Controls (to be implemented to eliminate or reduce the risk to the lowest practicable level)	Person responsible for Control
Crossing live lines	A qualified Protection Officer (PO) or Access Corridor Safety (ACS) must make a safety assessment to cross live lines in accordance with NGE200 and supervise workers who do not hold the PO or ACS qualification.	Qualified PO/ACS
Accessing Danger Zone to conduct plate test	Use appropriate safety measures as validated by a PO. Refer to diagram for minimum safety assessment.	Qualified PO
Electricity	ATWS antennae not to encroach safe approach distance to overhead wiring	Operator
Slips, trips, falls carrying ATWS equipment	Use correct manual handling techniques, secure safety boots, clear obstacles for work area and agree a safe path.	All
Approaching rail traffic	Lookout Working using approved ATWS as assessed in the plan & diagram. All points of entry have been validated and ATWS safety measures (sensors) have been installed. Confirm with the Operator that the ATWS has been tested and is operational. Workers immediately move to the designated safe place when warned. Provide ALL CLEAR handsignal after workers and equipment are in a safe place. After the warning has been cancelled, confirm there is no approaching rail traffic between the sensors and the worksite before allowing work to resume.	PO
Ineffective ATWS warnings / Adjoining / surrounding worksites	Test and confirm workers can see and hear the warning in the noisiest environment. Explain the emergency warnings. Workers to be within 50m of warning device. Workers to always remain within sight and hearing of warning unit. Radios not to be used near ATWS.	PO
Train warning time longer than expected (stopping points or ATWS equipment fault)	Workers to remain in a safe place until confirmed the ATWS is working correctly. Contact the Signaller or visually confirm the line is clear between the sensors and the worksite. Potential stopping points: Scarborough Station Platform Limits	PO
Unsignalled movements in Yard limits	Position lookout(s) in safe place. Confirm minimum sighting distance can be achieved. Test effective communication and be within sight and hearing of the workers.	PO / lookouts
Bi Directional rail movements	ATWS sensors in place on both tracks in both directions to warn workers of approaching rail traffic.	PO
Second train warning cancelled in error	Nominate a team member to confirm with the Operator when each rail traffic has completely passed the worksite. Tell the PO and workers about the second train warning. Cancel each warning after each train has completely passed the worksite.	Operator / nominated team member
Distraction	Obtain permission from PO to use electronic devices in the Danger Zone.	All
Obstructions to safe place	Agree on paths to reach designated safe places from the worksite.	PO
Electrical storms	Stop work immediately	All

ATWS Worksite Protection for Scarborough Routine Network Maintenance Activities

Workplace Supervisor details

Emergency assembly point: SWMS/SWI Ref #:
 First aid kit location: First aider:

Workplace Supervisor acknowledgement

The Workplace Supervisor acknowledges that all identified WHS and rail safety hazards have the appropriate controls in place to manage and/or eliminate the hazards.

Yes

Participant Acknowledgement

NOTE: Recipients of the briefing are to question the Briefer if they don't understand any part of this briefing.

All workers listed below acknowledge that they:

1. have been inducted to the site 2. are free from alcohol and drugs 3. are free from the effects of fatigue 4. hold the applicable and current Rail Safety Worker Authorisation, trade licence and/or induction record e.g. Construction Industry Induction 5. must wear the appropriate Personal Protective Equipment (PPE)	6. have been briefed on the contents of the Worksite Protection Plan 7. have been shown the Worksite Protection Plan diagram 8. understand the kinds and limits of worksite protection in place 9. have been briefed about any new hazards and controls identified during the final site inspection (<i>final site inspection must be conducted immediately before commencing work</i>)
---	--

Mark each check box below with a tick if the item applies or a cross if the item does not apply.

<input type="checkbox"/> have been informed of the requirements of the electrical permit (if required)	<input type="checkbox"/> have been made aware of any hazardous materials/substances on site
<input type="checkbox"/> have been briefed on the SWMS/SWIs/documentated safe work practice for the job	<input type="checkbox"/> have been briefed on Safety Data Sheets (SDS)
<input type="checkbox"/> have been instructed in the controls recorded in this document and SWMS/SWIs	<input type="checkbox"/> have been briefed on the WHS Management plan
	<input type="checkbox"/> have been briefed on the hazards of adjoining worksites/processes.

ATWS Worksite Protection for Scarborough Routine Network Maintenance Activities

INSTRUCTIONS:	1. Workers enter the rail corridor via access gate 100 63.017 U
	2. Use assets to validate worksite location on Up and Down Illawarra lines between 62.791km to 63.021km
	3. Conduct WP Pre-work briefing to set-up ATWS.
	4. Tell Signaller at Wollongong North Panel about the use of lookout working with ATWS.
	5. Access Up Cess 62.400km via access gate 100 62.460 U, verify sensor label & connect to sensor cable, calibrate with test plate, connect, and turn on the transmitter.
	6. Access Up Cess 63.513km via access gate 100 63.183 U, verify sensor label, connect to sensor cable, calibrate with test plate, connect & turn on transmitter.
	7. Place warning system on same side of tracks if working on one track only within sight & hearing of workers, conduct siren & light self-test, & connect to transmitter(s).
	8. Record first rail traffic movement test for each sensor on ATWS Check-sheet.
	9. Conduct WP Pre-work briefing for lookout working with ATWS and confirm workers have seen and heard the warning.
	10. Start work when advised by the PO and move to the designated safe place when warned.
	11. When work is complete, and workers and equipment are in a safe place, turn off and pack up warning unit
	12. Access Up Cess to turn off and pack up transmitter unit(s).
	13. Access Up Cess to turn off and pack up transmitter unit(s).
	14. Access Up Cess for all workers to leave the rail corridor via access gate 100 63.017 U
	15. Tell Signaller at Wollongong North Panel when work is completed, and the workers and their equipment are clear of the Danger Zone.

ATWS Worksite Protection for Scarborough Routine Network Maintenance Activities

(This page is optional and may be separated and given to the assigned operator to assist set-up of ATWS equipment. Refer also to Refer to "D2015-45354 Wireless ATWS (Automatic Trak Warning System)" for detailed instructions.)

Setup Stage 1: Checklist for ATWS transmitter and sensor

Step	Task Description	Installer Check
1	Verify Track Label for location of sensor as per the Protection Diagram and Photos in this document	
2	Confirm equipment is within inspection date	
3	Sensor direction is per Worksite Protection Diagram and photos in this document	
4	Connect sensor cable to junction box	
5	Confirm all batteries are fully charged	
6	Connect junction box to ZFS using channel T1-T4	
7	Commence calibration and automatic self- test	
8	Perform function test using test plate	
9	Confirm transmitter booked in to correct T- channel (T1-T4)	
10	Select & confirm channel for the radio transmitter (AU3 OR AU4)	
11	Perform worksite warning test using test plate	
12	Lock device & remove key	

Setup Stage 2: checklist for ATWS worksite warning unit

Step	Task Description	Operator Check
1	Confirm equipment is within inspection date	
2	Confirm Audible level	
3	Confirm and set Radio Channel for Warning unit	
4	Book in ATWS sensor 1	
5	Book in ATWS sensor 2	
6	Book in ATWS sensor 3	
7	Book in ATWS sensor 4	
8	Perform Worksite Warning Test with all ATWS sensor	
9	Ensure the workers have seen the visual warning and heard the audible warning	
10	Select and Confirm Channel for the Radio Transmitter	
11	Confirm worksite warning unit is operational with Installers and advise them to lock devices & remove key
