Sunday, 1 January 2017

RailSafe

See online for all Safeworking Information

www.railsafe.org.au

Safeworking information, such as Weekly Notices and SAFE Notices, is available on the RailSafe website.

By accessing Weekly Notices and SAFE Notices online, you will receive safety information more quickly. Weekly Notices remain on the RailSafe website for two years; Permanent and Temporary SAFE Notices remain online as long as they are current.

Anyone needing back issues of Weekly Notices and SAFE Notices should contact the Network Rules unit.

If you are outside Sydney Trains, you can reach the RailSafe website via the following address:

www.railsafe.org.au

Other Safeworking documents, such as Network Rules, Network Procedures, Network Local Appendices, Safeworking Policies, SafeTracks flyers, and contractor information are also available online.

PUBLICATION DEADLINES AND SUBMISSION OF ARTICLES

Dates of the next four Weekly Notices and deadlines for articles are:

Weekly Notice	For Week	Deadline
1	2/1/17–8/1/17	29/11/16
2	9/1/17–15/1/17	6/12/16
3	16/1/17–22/1/17	6/12/16
4	23/1/17–29/1/17	15/12/16

So that printing and distributing schedules can be met, it is essential articles are received by the deadline.

Late articles will be published in the next issue of the Weekly Notice. This may result in information not being distributed in time for it to be acted upon.

When submitting articles, please include your name, position title, telephone numbers and email details at the end of the articles as shown below:

TRAIN EXAMINATIONS – EXTRA PRECAUTIONS DURING THE WOLO RISK PERIOD (OCTOBER TO MARCH)

ATTENTION: All train examiners

Rollingstock can contribute to track buckles.

Between October to March each year, higher temperatures increase the risk of track buckles on welded track due to expansion of the rails.

Rollingstock with poorly tracking or hunting bogies can apply additional lateral force to the rails that disturb the track structure under these conditions. This can contribute to track buckling under a train or after the passage of a train.

Train examinations: Passenger and freight trains

To reduce the track buckling forces from rollingstock, the following components should be inspected more closely during the WOLO risk period:

Constant contact side bearers (where fitted)

Check for wear of non-metallic components, and that the side bearers are seating correctly with no gap (see Figure 2). This applies mainly to freight, but also applies to passenger rollingstock such as NHA bogies under XPT and J type bogies under S, K and C sets.

Friction wedges

Check for excessive wedge rise, condemn notch thickness, and wear plate condition.

Wheel profiles

Check for excessive flange wear and arises.

Overloading or unbalanced loading

Check For spring deflection, obviously incorrect loading of wagon including over decks of multipack wagons.

Continued on the next page

Evidence of hunting

Tell-tale signs of hunting are any of the following:

- fresh bolster gib wear (see Figure 1)
- wear between the side of the friction wedge and bolster pocket (see Figure 1)
- fresh wear between the axle box or the bearing adaptor and bogie side frame
- melting of plastic elements in the constant contact side bearers due to friction heating (see Figure 3).

Freight wagons with the following hunting defects should be marked off, or reduced to 50km/h maximum speed, when a WOLO has been declared.

Figure 1: High gib/side frame wear and friction wedge lateral wear

Figure 2: Constant contact side bearer with point contact

Continued on the next page

Figure 3: Constant contact side bearers with melted plastic blocks

What to do if defects are detected or reported

Defects are usually identified via passenger complaints (for passenger trains), and drivers and wayside staff reports and observations, including roll-by inspections (for freight trains).

Any passenger vehicle, freight train or locomotive should undergo corrective action if suspected of hunting.

Freight vehicles showing any of the above defects should be marked off, or operate at reduced speed until corrective action is taken.

The reduced speed shall be the maximum permitted track speed not exceeding 50km/h when a WOLO has been declared.

The reduced speed when a WOLO has been declared is published in the Train Operating Conditions Manual General Instruction Pages, Section 3 Page 5.

Note: These items form part of the normal train examination procedures, but are especially important at this time of year when track buckles are a greater risk. Please refer to your examiners manuals for the inspection procedure and limits for these components and, if you have any questions, speak with your supervisor.

TRACK DISTURBANCE BETWEEN OCTOBER AND MARCH

ATTENTION: All engineering and construction staff who work on or about the track

Disturbance of the track during the period October to March can cause track misalignments (track buckles).

Be aware of:

- Bumping of the track (e.g bumping the track with a front-end loader).
- Knocking down or removing ballast profile (e.g running along the ballast shoulder in a truck).
- Undermining the ballast profile by excavation (e.g excavating a trench beside or under the track).

Report all track disturbances

If the track is disturbed, report it immediately to local track staff.

Planned work to be advised to email address PermissionToDisturb@transport.nsw.gov.au

WORKSITE PROTECTION HAZARDOUS CORRIDOR LOCATIONS REGISTER IS NOW LIVE ON THE RAILS SAFE WEBSITE

Since **Tuesday, 15 November 2016**, the Hazardous Corridor Locations Register has been reviewed and revised and is now available on the RailSafe website as the Worksite Protection Hazardous Corridor Locations Register.

The review of the register commenced in August 2016 and has been conducted utilising the services of the Rail Safety Coaches, Protection Officers and Line Managers being involved in workshops to decide the look and content of the register. There has also been consultation and briefing sessions with Team leaders and Maintenance Depot staff during the review.

As a result of these workshops and consultation sessions, a revised reporting form, to be utilised to verify, modify or add to the register, has been developed and is now also available on the RailSafe website. Rail Safety Coaches and workers who are familiar with the areas in which they work, and who regularly utilise the register, are encouraged to familiarise themselves with the document and to send changes to the register through the reporting form.

OPERATOR SPECIFIC PROCEDURES PRINT TO DIGITAL PUBLICATION

From **Sunday, 18 December 2016**, the Operator Specific Procedures (OSPs) will be withdrawn as a hard copy publication from the Network Rules publications and will no longer be printed and distributed.

The OSPs will continue to be published as an online digital publication to the RailSafe website and from 18 December 2016 will become effective immediately from the time the OSP unit has been uploaded to RailSafe. Removing the hard copy OSPs will enable the OSP units to be updated individually and without the previously required lead time for printing and distribution of an entire OSP reprint or Safe Notice to capture any changes.

Employees will need to destroy the hard copy publication of the OSPs that were printed and distributed in July 2014. In addition to this instruction the Permanent Safe Notices relating to the following OSPs must be destroyed:

Number	Title
OSP 7	Right of way procedure for Guards and Passenger Service Supervisors
OSP 13	Responding to a medical emergency on a train
OSP 15	Propelling trains
OSP 23	Responding to wayside train condition monitoring alarms
OSP 25	Customers requiring boarding assistance

With the transition away from printing the hard copy publication of the OSPs there will be some OSP units that will be transferred from Network Rules custodianship to the relevant business groups. The transfer of custodianship is planned to take place in December 2016. The details of the new custodian, name of the document, location of where the transferred document will be available and effective date will be advertised via a Safe Notice.

HURSTVILLE (ILLAWARRA) – CONVERSION OF 980A/B POINTS TO D84M MKIII WITH SPHEROLOCK MECHANISM

Commencing at 0200 hours on **Saturday, 7 January 2017**, and continuing until 0200 hours on Sunday, 8 January 2017, the following work will be carried out:

- The existing 980A points on the Down Illawarra Main and 980B points on the Up Illawarra Main will be renewed. The point mechanisms will be replaced with a D84M MkIII point machine utilising an in-bearer Spherolock arrangement.
- 980A points will be relocated approximately 4.7m towards Sydney and 980B points will be remained in same location.
- The existing Emergency Switch Machine Lock (ESML) equipment will be replaced with an Emergency Operations Lock (EOL) of the fortress key type and retained in the existing location.

HARRIS PARK TO PENDLE HILL: CONVERSION OF M16.4, S16.4, M16.8, S16.8, M17.2, S17.2 SIGNALS TO LED TYPE

Commencing at 0200 hours on **Saturday, 14 January 2017**, and continuing until 0200 hours on Monday, 16 January 2017 the following work will be carried out:

- Signals M16.4, S16.4, M16.8, S16.8, M17.2, S17.2 will be renewed to LED type lamps.

The indications displayed remain the same, as will the form of the signals.

SCARBOROUGH (ILLAWARRA) – PROVISION OF HALF BOOM BARRIERS ON CLIFTON SCHOOL PDE LEVEL CROSSING

Commencing at 0200 hours on **Saturday, 7 January 2017** and continuing until 0200 hours on Monday, 09 January 2017, the following work will be carried out:

- The existing Clifton School pde level crossing will be upgraded to include half boom barriers.
- An additional warning bell will be provided on the Up side. The bells are switched off between 2200 hours and 0600 hours AEST.
- Wollongong Control Panel, Console Desk and Scarborough Maintenance Diagram will be amended to the new arrangements.
- The Test switch box will be removed.
- The level crossing warning equipment and its operation will be automatically controlled by the approach of trains in both the Down and Up directions.
- All level crossing trackside signs will be relocated. The approved distance from the trackside signs to Clifton School pde level crossing are as follows:
 - Main line Down direction – 419m
 - Down Main Up direction – 585m
 - Up Main Up direction – 585m
- The Emergency Switch box will be replaced. Housed within the new Emergency Switch box will be a Master Emergency switch, Country Side Boom switch and a Sydney Side Boom switch. The keys for the emergency switches will be held at the SM's office at Thirroul.
- The operation of the Master Emergency Switch will affect signals WG626, WG627 and WG628.

SYDENHAM (ILLAWARRA) – RENEWAL OF 745 A/B POINTS

Commencing at 0200 hours on **Saturday, 7th January 2017**, and continuing until 0200 hours on Monday, 9th January 2017, the following work will be carried out:

- The existing 745A points on the Up Illawarra Main and 745B points on the Up Illawarra Local will be renewed. The point mechanisms will be replaced with an 'A' type point control unit utilising an in-bearer Spherolock arrangement.
- 745A points will be relocated approximately 5m towards Country.
- 745B points will be relocated approximately 4.5m towards Sydney.
- An Emergency Operations Lock (EOL) of the keyless type will be provided at 745B end.

REQUESTS FOR NETWORK MANUALS AND FORMS

Please regularly check that your Network Manuals and Forms are up to date and include the current status sheet numbers for each section, as listed in this Weekly Notice.

If your manuals do not have the correct status sheets, they have not been properly amended and the Safeworking information will not be up to date.

All Sydney Trains staff issued with Network Manuals and who require regular updates and amendments need to contact their relevant distribution officer, as listed in this Weekly Notice, to have their name and contact details included in the distribution list. This will ensure that you receive all updated Network Manuals and Forms.

All requests to receive Safeworking documentation must be forwarded through your controlling officer to the appropriate distribution officer.

Those outside Sydney Trains can access Safeworking information by visiting the RailSafe website at www.railsafe.org.au
