#### **Worksite Protection Pre-work Briefing**

			Briefing date:	/ /
<b>Protection Office</b>	r Details			
	name	signature	9	contact No.
Work location:	Unanderra Yard			
Scope of work:	Routine Network Maint	tenance Activities		
Worksite protecti	on: Lookout Working		Refer to Worksite Protect	ion Plan for details

<b>Hazards</b> (e.g. Site specific hazards identified, including physical environment, human errors, plant and equipment)	Controls (to be implemented to eliminate or reduce the risk to the lowest practicable level)	Person responsible for Control
Struck by rail traffic	Lookouts must be trained and competent to perform lookout duties.  Lookouts must be rotated if performing lookout for extended periods of time  Workers to remain within worksite limits as set out in this procedure.  Lookouts must be placed as per protection plan on page 8.  Workers are to stop work and move to a safe place immediately on being warned by the lookouts	Protection Officer & Lookout
Live adjacent lines	Lookouts must provide warning to workers when rail traffic is approaching from the adjacent line in either direction.	Protection Officer & Lookout
Two - way running / multiple entry points into worksite	One Lookout placed watching each direction before work starts. Lookouts are to warn workers of approaching rail traffic, including rail traffic entering or travelling within the worksite. Workers are to stop work and move to a safe place.	Protection Officer & Lookout
Obstruction to Minimum Sighting Distance	Lookouts must provide warning to the workers whenever their line of sight is obstructed by passing rail traffic. Workers must stop work and move to a safe place and reassess positioning and method	Protection Officer & Lookout
Adjoining/Surrounding Worksites	Lookouts must have two independent audible warning devices that can be heard by workers over any noise generated by adjoining/surrounding worksites.  Lookouts are to provide warning if their line of sight is obstructed by adjoining/surrounding worksites.	Protection Officer & Lookout
Access to / Egress from worksite	Access and egress points must be agreed prior to entering the danger zone, consideration should be given to ease of access and safest possible entry and exit points.	All
Slips, trips, falls and hazards carrying equipment	Protection Officer will assess and instruct when it is safe for workers to use NGE 200 Walking in the Danger Zone to move to the worksite or safe place.

Diagrams, notes, and detailed instructions are over the next pages. These are to be read and followed as part of this worksite protection plan for Lookout Working.

### **Lookout Working Worksite Protection for Unanderra Yard Routine Network Maintenance Activities**

#### **INSTRUCTIONS:**

- Workers enter the rail corridor via access gate 100 88.341 D Protection Officer briefs workers about the worksite protection arrangements.
- 2. Protection Officer contacts Wollongong South Panel and tells the Signaller about the use of Lookout Working.
- 3. Establish Lookouts at designated locations.
- 4. Workers start work up to designated locations.
- 5. Workers move to safe place.
- 6. Re-establish Lookouts at next designated location.
- 7. Repeat steps 6-8 until work is complete.
- 8. Workers move to a safe place.
- 9. Recall lookouts.
- 10. Workers egress the worksite via access gate 100 88.341 D
- 11. Protection Officer contacts Wollongong South Panel to end Lookout Working.

### ADDITIONAL DETAILS

#### Obstruction to Minimum Sighting Distance

Stabled rail traffic on any tracks and conditions on the day may obstruct minimum sighting distance. When this hazard is identified, workers must stop work and move to a safe place until the Protection Officer makes an assessment and relocates lookouts to achieve the required minimum sighting distance.

Work is only to be performed on sections of track highlighted on the Diagram. Under this RNMWPP work cannot be done on the

- Down Illawarra between the limits of the limits of the platform 1
- Up Illawarra between B Frame and C Frame
