Sunday, 15 November 2015

RailSafe

See online for all Safeworking Information

www.railsafe.org.au

Safeworking information, such as Weekly Notices and SAFE Notices, is available on the RailSafe website.

By accessing Weekly Notices and SAFE Notices online, you will receive safety information more quickly. Weekly Notices remain on the RailSafe website for two years; Permanent and Temporary SAFE Notices remain online as long as they are current.

Anyone needing back issues of Weekly Notices and SAFE Notices should contact the Network Rules unit.

If you are outside Sydney Trains, you can reach the RailSafe website via the following address:

www.railsafe.org.au

Other Safeworking documents, such as Network Rules, Network Procedures, Network Local Appendices, Safeworking Policies, SafeTracks flyers, and contractor information are also available online.

PUBLICATION DEADLINES AND SUBMISSION OF ARTICLES

Dates of the next four Weekly Notices and deadlines for articles are:

Weekly Notice	For Week	Deadline
46	16/11/15–22/11/15	20/10/15
47	23/11/15–29/11/15	27/10/15
48	30/11/15–6/12/15	3/11/15
49	7/12/15–13/12/15	10/11/15

So that printing and distributing schedules can be met, it is essential articles are received by the deadline.

Late articles will be published in the next issue of the Weekly Notice. This may result in information not being distributed in time for it to be acted upon.

When submitting articles, please include your name, position title, telephone numbers and email details at the end of the articles as shown below:

Steve Swanson

Network Rules Specialist

Email: stephen.swanson@transport.nsw.gov.au

TRAIN EXAMINATIONS – EXTRA PRECAUTIONS DURING THE WOLO RISK PERIOD (OCTOBER TO MARCH)

ATTENTION: All train examiners

Rollingstock can contribute to track buckles.

Between October to March each year, higher temperatures increase the risk of track buckles on welded track due to expansion of the rails.

Rollingstock with poorly tracking or hunting bogies can apply additional lateral force to the rails that disturb the track structure under these conditions. This can contribute to track buckling under a train or after the passage of a train.

Train examinations: Passenger and freight trains

To reduce the track buckling forces from rollingstock, the following components should be inspected more closely during the WOLO risk period:

Constant contact side bearers (where fitted)

Check for wear of non-metallic components, and that the side bearers are seating correctly with no gap (see Figure 2). This applies mainly to freight, but also applies to passenger rollingstock such as NHA bogies under XPT and J type bogies under L, R, S, K and C sets.

Friction wedges

Check for excessive wedge rise, condemn notch thickness, and wear plate condition.

Wheel profiles

Check for excessive flange wear and arises.

Overloading or unbalanced loading

Check For spring deflection, obviously incorrect loading of wagon including over decks of multipack wagons.

Continued on the next page

Evidence of hunting

Tell-tale signs of hunting are any of the following:

- fresh bolster gib wear (see Figure 1)
- wear between the side of the friction wedge and bolster pocket (see Figure 1)
- fresh wear between the axle box or the bearing adaptor and bogie side frame
- melting of plastic elements in the constant contact side bearers due to friction heating (see Figure 3).

Freight wagons with the following hunting defects should be marked off, or reduced to 50km/h maximum speed, when a WOLO has been declared.

Figure 1: High gib/side frame wear and friction wedge lateral wear

Figure 2: Constant contact side bearer with point contact

Figure 3: Constant contact side bearers with melted plastic blocks

What to do if defects are detected or reported

Defects are usually identified via passenger complaints (for passenger trains), and drivers and wayside staff reports and observations, including roll-by inspections (for freight trains).

Any passenger vehicle, freight train or locomotive should undergo corrective action if suspected of hunting.

Freight vehicles showing any of the above defects should be marked off, or operate at reduced speed until corrective action is taken.

The reduced speed shall be the maximum permitted track speed not exceeding 50km/h when a WOLO has been declared.

The reduced speed when a WOLO has been declared is published in the Train Operating Conditions Manual General Instruction Pages, Section 3 Page 5.

Note: These items form part of the normal train examination procedures, but are especially important at this time of year when track buckles are a greater risk. Please refer to your examiners manuals for the inspection procedure and limits for these components and, if you have any questions, speak with your supervisor.

Michael Uhlig

Lead Rolling Stock Engineer

Email: Michael.Uhlig@transport.nsw.gov.au

TRACK DISTURBANCE BETWEEN OCTOBER AND MARCH

ATTENTION: All engineering and construction staff who work on or about the track

Disturbance of the track during the period October to March can cause track misalignments (track buckles).

Be aware of:

- Bumping of the track (e.g bumping the track with a front-end loader).
- Knocking down or removing ballast profile (e.g running along the ballast shoulder in a truck).
- Undermining the ballast profile by excavation (e.g excavating a trench beside or under the track).

Report all track disturbances

If the track is disturbed, report it immediately to local track staff.

Planned work to be advised to email address PermissionToDisturb@transport.nsw.gov.au

COMMISSIONING OF ARS FOR HORNSBY AND HORNSBY NORTH PANEL AT HOMEBUSH CONTROL CENTRE

Commencing 22:00 hours on **Friday, 13 November, 2015** and continuing until 04:00 hours Saturday, 14 November 2015, the existing control and indication panel for Hornsby and Hornsby North at Homebush Control Centre will be seamlessly upgraded to have ARS functionality available to the Area Controllers to route trains through Hornsby Area.

All necessary control system equipment will be upgraded and configured in the existing spare desk at Homebush Control Centre to allow monitor and control at Hornsby from the spare workstation desk if needed.

Vince Lofaro

Control Systems Project Delivery Manager

EASY ACCESS STATION UPGRADES, FLEMINGTON STATION – HIGH RAIL ACCESS PAD

Commencing at 0200 hours on **Monday, 16 November 2015**, a track vehicle access point at 14.174kms, Sydney side of Flemington station, will be introduced in to the down suburban and will be fully operational.

Any further information required regarding the operation of this track vehicle access point can be obtained from;

CHANGE OF METRONET TRAIN RADIO SIGNALLER CONTROL AREAS FOR ASHFIELD AND ILLAWARRA

Commencing at 0300 hours on **Monday, 16 November 2015**, the MetroNet Train Radio Signaller Boundary between Ashfield and Illawarra will be re-arranged as below as part of the Strathfield Ashfield ATRICS Project commissioning activity:

Controller's Name	Area Code	Track	From	To
Ashfield	058	Up Main	Boundary between Ashfield and Strathfield remain with no change	Signal M1.8 at 2.907km
		Down Main	Boundary between Ashfield and Strathfield remain with no change	Signal M1.79 at 2.907km
		Up Suburban	Boundary between Ashfield and Strathfield remain with no change	Signal S1.8 at 2.907km
		Down Suburban	Boundary between Ashfield and Strathfield remain with no change	Signal S1.79 at 2.907km
		Up Local	Boundary between Ashfield and Strathfield remain with no change	Signal L1.8 at 2.907km
		Down Local	Boundary between Ashfield and Strathfield remain with no change	Signal L1.79 at 2.907km

Continued on the next page

Illawarra	035	Up Main	Signal M1.8 at 2.907km	Sydney Side Boundary of Illawarra remain with no change
		Down Main	Signal M1.79 at 2.907km	Sydney Side Boundary of Illawarra remain with no change
		Up Suburban	Signal S1.8 at 2.907km	Sydney Side Boundary of Illawarra remain with no change
		Down Suburban	Signal S1.79 at 2.907km	Sydney Side Boundary of Illawarra remain with no change
		Up Local	Signal L1.8 at 2.907km	Sydney Side Boundary of Illawarra remain with no change
		Down Local	Signal L1.79 at 2.907km	Sydney Side Boundary of Illawarra remain with no change

Mark Cruchley

REQUESTS FOR NETWORK MANUALS AND FORMS

Please regularly check that your Network Manuals and Forms are up to date and include the current status sheet numbers for each section, as listed in this Weekly Notice.

If your manuals do not have the correct status sheets, they have not been properly amended and the Safeworking information will not be up to date.

All Sydney Trains staff issued with Network Manuals and who require regular updates and amendments need to contact their relevant distribution officer, as listed in this Weekly Notice, to have their name and contact details included in the distribution list. This will ensure that you receive all updated Network Manuals and Forms.

All requests to receive Safeworking documentation must be forwarded through your controlling officer to the appropriate distribution officer.

Those outside Sydney Trains can access Safeworking information by visiting the RailSafe website at www.railsafe.org.au

External users who wish to purchase hard copies of the Network Rules and Network Procedures can download an order form from the RailSafe website under Contractors on the top menu bar.
