

Second PILOT: CSN for work in an LPA**TRANSPORT****What's happening and Why?**

Corridor Safety System has been operating since 2016, confirming the authorisation status of Protection Officers and reviewing their preparation for work on the track, except for work within Local Possession Authorities (LPAs).

As a safety improvement, the requirement to obtain a CSN for work in an LPA will provide the ability to **confirm the authorisation status of POs**, and that they have **received the induction before working in the LPA**.

The second pilots have been scheduled for Week 9, Week 10 and Week 12 only.

When is this happening?

The second soft launch pilot will be on 29 August 2022.

The tables below list LPAs included in the pilot. (**NOTE:** Work in other LPAs does not require a CSN)

What is needed from you?

If you are a PPO, PPO Assist, CPO, and PO, you will need to:

- PACT # will be given by the PPO
- Obtain a CSN. Please call CSS after you get the induction to the possession (ideally 1-2 days before the work), and call after 10:00 am (to avoid peak hours).
- Quote the CSN when signing in to commence work in the Possession
- Protection staff DO NOT need to call for CSN, unless implementing work on track method or authority

If you are a Possession Protection Officer / Assistant:

Ask for and record the CSN in PACT (see screenshot below) for each PO or CPO working in the LPA or document it in the PPO’s dairy.
