		No. 1 Siding/	Down Port	Kembla Line		
	Clear of 531 Points (BHP	Sidings)]		WG 51 D	

The following are diagrams, notes and detailed instructions. These are to be read and followed as part of this worksite protection plan for TOA.

INSTRUCTIONS:	1. Workers enter the rail corridor via Access Gate I10 87.923 via BlueScope			
	Protection Officer conducts the worksite protection pre-work briefing.			
	 Protection Officer calls BlueScope Road Control (02 4275 7494) and requests 531 points be secured to prevent access to B Frame. Protection Officer receives and records BlueScope Isolation number 			
	4. Protection Officer contacts the Signaller at Wollongong Panel and requests TOA.			
	 Instruct Qualified Workers to clip and lock 186 points and 190 points to prevent access to the worksite and place a Worksite Protection Marker clear of the points 			
	Protection Officer places a Worksite Protection Marker clear of 531 points and informs the workplace supervisor that it is safe for work to start.			
	7. Workers start work.			
	8. After all work is completed, move all workers and equipment into a safe place.			
	9. Instruct Qualified Workers to remove Point Clips, Worksite Protection Markers from the TOA.			
	10. Workers egress the rail corridor via			
	11. After all protection is removed, Protection Officer contacts the Signaller Wollongong Panel that work is complete, all protection has been removed from the line, workers and equipment are clear of the Danger Zone and if any restrictions have been applied to fulfil the TOA.			
	12. Protection Officer calls BlueScope Road control and advises that all work is complete under the provided isolation number.			
ADDITIONAL INFORMATION	531 points are controlled and operated by BlueScope Road Control, before any work can take place the Protection Officer must call and advise BlueScope Road Control what protection is required at 531 points as it is an intermediate access point.			
	When BlueScope Road Control have applied the protection (clipped and locked 531 points to prevent access into the worksite), they will issue the Protection Officer an Isolation Number.			
	The Protection Officer must then need to provide the Isolation Number to the Signaller before the requested TOA is issued.			
	The Protection officer must place the Worksite Protection Marker clear of 531 (Image 3) points once the TOA is issued prior work commencing.
