## Approved Worksite Delineation Markers

This information has been prepared to inform Qualified Workers on the requirements of Worksite Delineation Markers.

Worksites less than 500m apart inside an established Coordinated Worksite must only use approved Worksite Delineation Markers midway between adjacent worksites.

There are currently two kinds of approved Worksite Delineation Markers.

### Dual light Worksite Delineation Markers

Markers sourced by Asset Scheduling & Delivery Coordination (ASDC) are approved for use as Worksite Delineation Markers.

Dual light Worksite Protection Markers must have the following specifications:

<i>Dual light Worksite Delineation Marker Specifications</i>	
Body color	Reflective Yellow
Light color	Amber
Output setting	Steady
Light brightness	> 0.5 Cd
Operational life	> 72 hours
Lens diameter size	> 100mm
Mounting	Rail clamp or amber dedicated stand

This type of Worksite Delineation Marker is available from ASDC.

**FIGURE 2:** Dual light Worksite Delineation Marker clamped to the rail.

### Single light Worksite Delineation Markers

Single light Worksite Delineation Markers are also commercially available. They must be used on an amber coloured dedicated stand, placed in the "4 foot".

Single light Worksite Delineation Markers must have the following specifications:

<i>Single light Worksite Delineation Marker Specifications</i>	
Body color	Yellow
Light color	Amber
Output setting	Steady
Light brightness	> 0.5 Cd
Operational life	> 72 hours

### *Single light Worksite Delineation Marker Specifications*

Lens diameter size	> 140mm
Mounting	Amber dedicated stand

The following are commercial single light Worksite Delineation Markers that meet requirements and are preferred for use:

- Unipart Dorman Pro-B-LITE Amber Synchro Traffic Beacon
- Unipart Dorman LEDaLITE Lamp – Traffic Beacon Warning Safety Light (Amber)
- Unipart Dorman Solar TrafILITE
