Single light colour light signals with in-line marker light

Single light colour light signals with an in-line red marker light are:

- controlled signals, or
- automatic signals, if an A sign or an A light is lit.

The marker light is lit if:

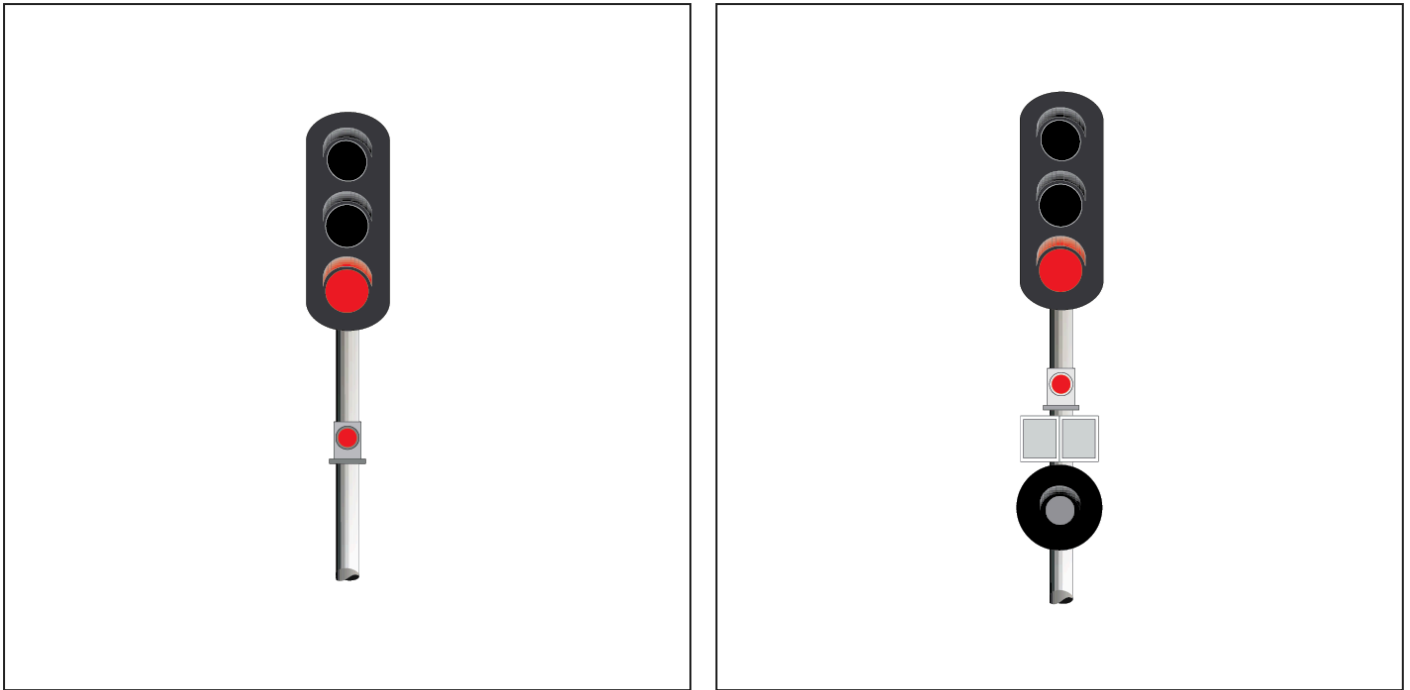

- the signal is at **STOP**, or
- the main light fails.

Lower turnout units

A **PROCEED** indication for a turnout route is displayed by a diagonal row of yellow lights on the turnout unit.

The row of lights is angled up towards the turnout route.
