Co-acting signals

If it is possible for a running signal to be obscured from a Driver's or Track Vehicle Operator's view, a co-acting signal may be used to provide information about the running signal indication.

Co-acting signals may have:

- a sign showing **CO-ACTING**, **INDICATOR**, or an abbreviation
- a signal identification sign with the same details as those on the primary signal.

FIGURE 11: Typical co-acting signals.
